## **WELCOME**

Welcome to the Nevada's Early Intervention Services Annual Report. We invite parents, service providers, advocates, higher education training institutions, advisory members, decision makers, health care providers, and the community-at-large to join us in sharing information and resources to support our youngest residents and their families. As this Annual Report demonstrates, State Fiscal Year 2007 has many accomplishments to celebrate.

This year's report provides a glimpse of the many accomplishments of the Bureau of Early Intervention Services and describes how early intervention providers have helped to enrich the lives of infants and toddlers with developmental delays. The successes found in this report are due to the dedication of all of those involved. Every family that participates in early intervention services is a beneficiary of the hard work and dedication of staff. Early intervention providers are the magicians in juggling all of the services that they provide on a daily basis. Clearly, it takes a team approach between parents and staff to improve the developmental skills of young children that will be the foundation for school success.

Today, five early intervention programs continue to serve families of infants and toddlers with developmental delays across Nevada. Every early intervention employee from these five programs have touched the lives of 3,058 families during State Fiscal Year 2007. We continue to work towards a goal of reaching all children who need services. We still have work to do.

As we continue into State Fiscal Year 2008, the Bureau is counting on Nevada's families, elected officials, community partners, and advisory bodies to guide and improve Nevada's early intervention system. For more information, please also access the Bureau's website- [www.health.nv.gov](http://www.health.nv.gov) or call Project Assist, an information and referral hotline at 1-800-522-0066.

Sincerely,

Janelle Mulvenon, Chief  
Bureau of Early Intervention Services

***The Mission of Nevada's Bureau of Early Intervention Services is to identify infants and toddlers who are at-risk for, or who have developmental delays; provide services and supports to families to meet the individualized developmental needs of their child; and facilitate the child's learning and participation in family and community life through the partnerships of families, caregivers and service providers.***

My daughter has Down syndrome. My darling daughter has taught us what a real human being is. She is very loving and is always smiling and, thank God, very healthy. My daughter has been in Early Intervention since she was one month old and the truth is that it not only has helped her, but also us. It has helped us a lot because they have explained all our questions and doubts very well. Many thanks for everything. My daughter has made a lot of progress with the help of your specialists.

Jacqui is very happy because she has three brothers and a seven-month-old sister that she loves a lot!

## **Guiding Principles**

### **Children are special and unique:**

- All children are unique, with their individual strengths and talents. The presence of a disability or special need is not the defining characteristic of a child.
- Children grow, develop and learn in the context of relationships with their families and other caregivers in everyday routines, activities, and community settings.
- Early Intervention enhances and supports community partners' capacity to serve and include young children with disabilities and their families, as all children have the right to belong, to be welcomed and to participate fully in their community.

### **Families are central to decision making:**

- Each family's priorities, values, hopes and diversity are honored.
- Families are partners and decision-makers in all aspects of services, as they are the experts about their child and family's needs.

### **The early intervention role:**

- Service providers across all disciplines value family participation and collaboration.
- Mutual trust, respect, honesty and open communication characterize the family-provider relationship, building on family strengths.

### **Services and supports:**

Services, supports and resources need to be timely, flexible, individualized and responsive to the changing needs of children and their families.

**Bureau of Early Intervention Services** has regional sites in the Las Vegas (3), Reno, Carson City, Elko, and Ely areas. In addition, REM Nevada and Easter Seals of Southern Nevada, private community organizations, are contracted to provide Part C, Early Intervention services in the southern region. Staff at each location provide comprehensive, family-centered, community-based, multidisciplinary early intervention services as directed by the Individuals with Disabilities Education Improvement Act of 2004 (P.L. 108-446). The following programs are provided:

1. **Nevada Part C Early Intervention Program** – provides services to children from ages birth through two years experiencing developmental delays and/or have a diagnosed condition that has a high probability of resulting in developmental delays. The services are provided to families to enhance their child's participation in home and community activities. This program operates under state policy and federal regulations that ensure specific parent rights. Before a child receives services, a comprehensive evaluation must be completed to determine eligibility. The parent and a team of professionals determine specific services.
2. **Screening and Monitoring Program** – provides follow-up services to help determine if a child is playing, talking, growing, and moving like other children the same age. At any time, a family can request a referral to the Early Intervention Program to determine if their child is eligible for specialized services, which are administered in accordance with federal law and include parent rights.
3. **Specialty Clinics** – are held in the areas of genetic disorders, metabolic disorders and cleft palate/craniofacial. Any child under the age of three can be referred to any of these clinics, which are held in Las Vegas and Reno.
4. **Hearing Screening Program** – available for any child under the age of three who may have a hearing concern and/or a hospital or physician has recommended a follow-up hearing test. These services are available in Las Vegas and Reno.

Daniel's physical therapy sessions with Angie have taught his Mom how to exercise him every day! Daniel's occupational therapy sessions with Meg have taught Mom how to feed Daniel. Meg also gave Mom great tips on how to prepare Daniel's homemade meals and how to teach Daniel to chew!!! Daniel loves his days with Angie and Meg! He especially loves to see Danette, his Developmental Specialist.

"Everyone at Nevada Early Intervention Services has been so helpful to our family. We really do not know what we would have done without these services" - Mom and Dad

Josue came to us at 6 months of age. He had a diagnosis of Hydranencephaly. His prognosis was poor. The family had only received negative feedback from the professionals that they had met with. They still had much hope and were thankful to have him, calling him a gift. Josue's family wholeheartedly jumped into services, giving him all the support that he needed. He currently is receiving physical therapy, occupational therapy, speech and language therapy, nutrition, special instruction, vision and assistive technology services. Josue has grown and developed beyond what doctors had told the family that he would be able to do. His diagnosis has changed to hydrocephaly. The transition process will begin in October as we are getting Josue ready for transition from early intervention at the age of three. Josue is demanding, and elicits a lot of love from our staff and his family. He is sitting with support, activating his noisy, musical toys, and lets people know, with his voice, when he is happy or agitated. Josue's journey has been long and full of challenges, but he continues to fight. Mom has been an inspiration to our team; we are proud to be a part of their lives and look forward to watching Josue continue to grow and learn.—Roberta Gettes Developmental Specialist III

Anthony was born at 25 weeks gestation in January 2005. He spent 4 months in the Neonatal Intensive Care Unit (NICU) before coming home. He weighed 1lb 5 oz at birth. His main issues have been feeding and speech. He has received speech and feeding therapy from NEIS. He has made great strides in both speech and feeding as a result of the help that NEIS has provided.

## Where Were Services Delivered?

## ***How Many Children Received Services Over The Course of the Year?***

**Table #13: Total Number of Children Served by Region by Program**

During fiscal year 2007 (July 1, 2006 through June 30, 2007), approximately 314 early interventionists provided services to 3,058 children and their families.

Easter Seals of Southern Nevada started receiving early intervention referrals on July 27, 2006, and REM Nevada started receiving early intervention referrals on February 5, 2007.

## FAMILY SURVEY DATA

The Part C, IDEA office contracted with the Nevada University Center for Excellence in Disabilities (UCED) to conduct the annual survey for families served by all programs operating through the Bureau of Early Intervention Services. The 2007 Survey was distributed to all families who had been in early intervention services for at least six months between July 1, 2006 and June 30, 2007. The six months in service requirement is a parameter established by the U.S. Department of Education, Office of Special Education Program. The survey was sent to 916 families statewide and a total of 125 were returned, at a rate of 23%.

There were 20 content questions contained in the survey. In all but three (3) of the 20 survey questions, at least 90% of the families responded indicating that they strongly agree or agree with the question. Family agreement was below 90% in three questions. A sampling of the survey questions and results statewide follows:

## MEET THE BEHRENS FAMILY

Our relationship with Early Intervention started when Bryan was still in the NICU. He had a perinatal stroke and we were told that he would likely have a disability. Bryan is now two and does have multiple disabilities, including cerebral palsy. The thing that might surprise some people is that the biggest challenge of having a child with a disability does not always lie in the child himself. On the contrary, Bryan is a delight to have in our family; he is full of snuggles and smiles. As parents, the hardest thing we have faced has been feelings of isolation from other parents, as well as worry about what the future holds. The best way to overcome this has been by talking with other parents of children with disabilities – sharing experiences and information. I am hoping that soon we can start a networking group for parents of children with physical disabilities.

NEIS has been invaluable, but I think parents can take it one step further by being a source of support for each other. If anyone is interested in getting together with other parents of children with physical/multiple disabilities – give me a call or email! I would love to hear from you. Nora Behrens — [cparentnetwork@hotmail.com](mailto:cparentnetwork@hotmail.com)

**Q25: As a team member of our child's early intervention program, when we/I or one of my family members have a concern about our child's or family's needs, it is addressed in the IFSP in a timely manner.**

#### NEIS Annual Family Survey 2007

**Q28: The supports and services we/I receive help meet our child's developmental needs.**

A total of 119 families provided additional comments. Of these 88 (74%) contained very positive feedback and 31 (26%) offered suggestions for program improvement.

## WHO ARE THE STAFF THAT SUPPORTED CHILDREN AND THEIR FAMILIES?

<b>Bureau of Early Intervention Services State and Accustaff Employees, June 30, 2007</b>	
<b>Direct Service Staff</b>	<b>251</b>
<b>Management Staff</b>	<b>18</b>
<b>Administrative Support Staff</b>	<b>21</b>
<b>Fiscal Staff</b>	<b>11</b>
<b>Part C Staff</b>	<b>8</b>
<b>Bureau Staff</b>	<b>5</b>
<b>Total</b>	<b>314</b>

\* Does not include REM and Easter Seals staff

## COSTS OF EARLY INTERVENTION SERVICES

### FY07 Budget and Expenses

The budget expenditures for the Bureau of Early Intervention Services, including its regional service sites and the Part C Office, was \$20,197,892.66 from state and federal sources. Federal sources include Part C, IDEA funds, Maternal Child Health Grant, Child Care Development Funds, and Medicaid. Private commercial insurance is billed with parent permission.

### FY07 Actual Expenditures by Funding Source:

<b>State Funds</b>	<b>\$13,934,991.45</b>
<b>Federal Funds</b>	<b>\$5,464,793.54</b>
<b>Medicaid/Insurance</b>	<b>\$798,107.67</b>
<b>Total Bureau of Early Intervention Services Expenditures</b>	<b>\$20,197,892.66</b>

\*Only \$60,529.55 of State General Funds was reverted in SFY 07.

"Roben was a micro-premature baby born at 26 weeks and weighing 1 pound, 9 ounces. She had a heart operation at 3 weeks and has had severe reflux and kidney problems. Without the help of her NEIS speech therapist Monica, I could barely feed Roben. Now she can take a bottle easily and enjoys exploring solid foods. Her interventionist, Jennifer, has been instrumental in her physical, cognitive, and social development." - Helen Goodale, mother of Roben

# A YEAR IN REVIEW FOR EARLY INTERVENTION SERVICES

## ***Northeastern Early Intervention Services (NE-NEIS)***

NE-NEIS operates from two offices:

### **Elko**

1020 Ruby Vista Drive, Ste. 102  
Elko, NV 89801

### **Ely**

435 South 13<sup>th</sup> Street  
Ely, NV 89301

The Northeastern staff covers the following:

Ely - Elko County (Wendover), White Pine County (McGill, Ely, Ruth, Lund), Lower Eureka County (Eureka), Lower Lander County (Austin), Upper Nye County (Duckwater Indian Reservation, Hadley/Round Mountain).

Elko – Elko County (all areas including Wendover), Upper Eureka County (Beowawe, Crescent Valley, Dunphy), Upper Lander County (Battle Mountain), and some of Humboldt County (Winnemucca).

Reno - One Developmental Specialist works out of the Reno site and covers Pershing County (Lovelock) and Humboldt County (Winnemucca, Imlay, McDermitt, and Denio).

## **Accomplishments**

- The previous “rural” territory was officially carved out of the Northern region into its own Northeastern region. The Northern region took over western rural areas leading to all three NEIS regions now having rural service delivery areas.
- The Ely site office moved into its permanent home on the Head Start grounds. This move allows for more collaboration between NEIS, Head Start, Early Head Start, Women and Infants and Children Program (WIC), and Family to Family.
- NE-NEIS staff and the Knights of Columbus (KOC) collaborated again to participate in their annual Tootsie Roll Drive. Staff stood alongside KOC members at different major stores throughout Elko and Spring Creek to hand out information on NEIS. The proceeds from the drive netted the parent fund \$1,800.
- NE-NEIS direct service staff in collaboration with the Family Resource Center of Northeastern Nevada and Family Respite of Northeastern Nevada started an evening parent/child group. This class was held on Tuesdays throughout winter and spring
- 92% of the Northeastern region’s Individualized Family Service Plans were written within 45 days.
- Total miles driven in FY 07 by Northeastern staff:  
Motor Pool cars: 102,300\*  
Personal Mileage: 6,229  
TOTAL: 108,529 miles  
\*Increased from 77,565 in FY 06
- NE-NEIS staff supported the internships of two social workers, one speech therapist, and one early childhood special education student.

## ***Northwestern Early Intervention Services (NW-NEIS)***

NW-NEIS operates from two offices:

### **Reno**

2667 Enterprise Road  
Reno, NV 89512

### **Carson City**

3427 Goni Road, Ste. 104  
Carson City, NV 89706

### **Accomplishments:**

- Family to Family playgroups continue to be a success. They are held every Wednesday at the NW-NEIS site and at the Family to Family Wells Avenue site.
- The service delivery model has been reconfigured to include more playgroups. A pilot project of playgroups for children 30 months and older has begun to ready them for transitioning into the school district or community. The playgroups provide parent networking and support, as well as social skills enhancement with typically developing children.
- Behavioral Assessment Teams (BAT) have been reconfigured to include the most experienced staff and the number of teams have decreased from four to two. Each team will mentor new staff through the process of becoming a BAT member, which will allow, over the course of time, to maintain qualified staff.
- The Northwestern region saw a 36% increase in the number of referrals in FY 07 from the previous year.
- Since last year, NW-NEIS has divided teams into geographic service regions to decrease the amount of travel and increase the efficiency of service delivery. The Carson City site has assimilated the former rural caseload from Silver Springs to Hawthorne.
- The Lytec electronic scheduling system is up and running. Staff are using Lytec to schedule their appointments, and billing staff can then reconcile kept appointments with submitted billing forms. This system will increase insurance revenues, which are invested in specialized therapies.
- A new Cerebral Palsy Parent Network is holding a playgroup and support group meeting at NW-NEIS the third Sunday of each month from 4:00 p.m.-6:00 p.m. under the direction of Nora Behrens, ICC Co-Chair and Parent Representative.
- In conjunction with Friends of Special Children (FSC), a new loaner hearing aid program has been implemented for children of NW-NEIS. The Sertoma Club generously provided funding for six loaner hearing aids, and the Reno Lion's Club generously provided funding for six more. The program allows children to have hearing aids, while their parents try to obtain permanent ones.

## ***Southern Nevada Early Intervention Services (S-NEIS)***

S-NEIS operates from three offices in Las Vegas:

### **S-NEIS-Valley View**

1161 South Valley View  
Las Vegas, NV 89102

### **S-NEIS-Flamingo**

3075 East Flamingo, Ste. 108  
Las Vegas, NV 89121

### **S-NEIS-North**

4528 West Craig Road, Ste. 290  
Las Vegas, NV 89032

## **Accomplishments:**

- S-NEIS staff members worked throughout the year on Outreach and Child Find activities. The highlight for the year was an Open House- Halloween Event held October 25, 2006. Invited guests included 411 family members and 61 community partners.
- Over the year, S-NEIS staff members presented information regarding NEIS to more than 25 community agencies that potentially refer children for early intervention services.
- S-NEIS staff members participated in and supported more than ten special community events, by hosting informational tables with brochures, handouts and activities to share with the public.
- A weekly e-mail newsletter, which includes community events for families to enjoy and a variety of informational topics for anyone interested in the development of young children, grew tremendously in the number of subscribers. Subscribers include 451 families, 226 community families, and 247 community partners.
- Explore and Learn community playgroups grew throughout the year to 30 different community sites. S-NEIS staff members (developmental specialists, therapists and family specialists) co-lead with community partners the parent/child groups. The inclusive groups include children and parents from S-NEIS and from the community.
- Sunrise Hospital- NICU Collaboration is a new project in which S-NEIS staff members meet with staff from the NICU and parents whose baby will be eligible for early intervention services. The team meets prior to the baby's discharge from the hospital to complete the intake, evaluation and IFSP. The S-NEIS staff members facilitate transition from the hospital to home.
- Memorandums of Understanding (MOUs) were established with the five school districts (urban and rural) to ensure a smooth transition. There are also formal agreements with the City of Las Vegas Recreation Department, Clark County Recreation Department, Touro University-Occupational Therapy Department, and Henderson Recreation Department.
- NEIS Speech and Language Pathologists have been providing a nine-week course "It Takes Two To Talk" for parents. Parents learn the techniques and practice in the natural environment. Developmental Specialists are also being trained so that on home visits they can reinforce the skills learned by the parents.
- The Care Bear Team provides support to staff members who have a child on their caseload who passes away. The team provides emotional support, resources for the service coordinator, and family, if needed.
- To address the overwhelming number of children who were in need of occupational therapy and physical therapy consultations, a schedule was set up for children to be seen on Fridays at the Valley View site.

### ***Easter Seals of Southern Nevada (ESSN)***

ESSN operates from one location in Las Vegas:

#### **Easter Seals of Southern Nevada**

6200 West Oakey Boulevard  
Las Vegas, NV 89146

#### **Accomplishments:**

- Easter Seals of Southern Nevada (ESSN) celebrated its one-year anniversary for providing early intervention services to children and families in July 2007.
- A total of 64 children were served during FY 07.
- ESSN established a toy and adaptive equipment loan library for families to provide examples of developmentally appropriate toys that meet the child's unique physical, communication, and cognitive needs.
- ESSN staff have received numerous trainings from Part C staff and have completed training in the use of the Hawaii Early Learning Profile and have transitioned to using this curriculum-based assessment for all new eligibility assessments.

### ***REM Nevada***

REM Nevada operates from one location in Las Vegas:

#### **REM Nevada**

5693 South Jones, Ste. 118  
Las Vegas, NV 89118

#### **Accomplishments:**

- REM Nevada began providing early interventions services to the first child on February 24, 2007.
- A total of 41 children were served during FY 07.
- Staff received extensive training from Part C, including New Employee Orientation, IFSP, Transitions, Developing Functional Outcomes and Child Outcome Summary Form (COSF).
- A Transition Memorandum of Understanding was finalized with the Clark County School District.
- Collaborative partnerships have been formed with UNLV and three of our staff are attending the NEIS Cohort for completion of the endorsement.

## ***Part C, IDEA Office***

Part C operates from two locations:

### **Carson City**

3427 Goni Road, Ste. 108  
Carson City, NV 89706

### **Las Vegas**

4528 West Craig Road, Ste. 290  
Las Vegas, NV 89032

## **Accomplishments:**

- The Early Childhood Outcomes Project was launched as part of the six year State Performance Plan. Data will be compiled on every child who entered early intervention in October 2006 to determine if early intervention made a difference in their development.
- A Hearing Task Force was established to look at systems and procedures statewide to ensure that children identified through Universal Newborn Hearing Screening are referred to early intervention services. New audiology equipment was purchased in the Northwestern and Southern regions.
- Vision Impaired InService in America (VIISA) training was provided to 25 early intervention staff statewide to create a larger pool of service providers trained in working with children with visual impairment.
- Part C, IDEA co-sponsored a DEC pre-conference workshop on Challenging Behaviors, in Reno, as part of the Nevada Association for the Education of Young Children Conference.
- Funding was provided to Family Ties for four early intervention parents to attend Partners in Policymaking training. Two of those graduates have become ICC parent representatives for the Northwest region.
- New employee orientation was provided to approximately 64 new staff statewide.
- Trainings were provided across the various regions on IFSPs, functional outcomes, service coordination, procedural safeguards and transition.
- Effective Practice Guideline Modules for Transition and Service Coordination were completed and distributed to early intervention staff statewide.
- A new Child Find poster was completed for statewide dissemination and a statewide mailing was sent to 1,100 physicians promoting referral to early intervention.
- Approximately 6,000 English and 4,000 Spanish Early Intervention Brochures for Protect and Immunize Nevada's Kids (PINK) were given to new mothers in southern Nevada.
- The milk carton campaign for Child Find has continued during October's Children with Special Health Care Needs month, with Anderson and Model Dairies. Estimation of dissemination is 550,000 cartons in the south and 35,000 cartons in the north.
- Funding for the Nevada Blind Children's Foundation in Las Vegas has continued to support monthly parent support groups and outreach activities.
- Collaborative relationships have been formed with Parent Support and Education Workgroup for Healthy Kids Benefit Committee, Positive Behavioral Support, Head Start State Collaboration Project, and Health Division Autism Task Force.

## LINKING EARLY INTERVENTION DATA TO STATE BIRTH DATA

The Tracking Resources and Children (TRAC) data collection system was linked to 2003-2006 State Birth Data in an attempt to gain more information about the causes of developmental delays in children. There were a total of 3,058 children served by the Bureau of Early Intervention Services during fiscal year of 2007 (07/01/2006-06/30/2007), 2,217 unique children were linked to the birth data. Excluding the 122 children born in 2007 where data is not yet available, about 75.5% of children served were linked to the birth data. Below is the distribution and percentage by birth year.

Birth Year	Children Served by BEIS in FY 2007	Number Linked to Birth Data	% Linked to Birth Data
2003	433	326	75.3%
2004	1,107	805	72.6%
2005	843	640	75.9%
2006	553	446	80.7%
2007	122	N/A	N/A
<b>Total</b>	3,058	2,217	75.5%

### Birth Weight Groups Comparison, Children served by BEIS in FY 2007 vs. Nevada Total, 2003-2006

Birth Weight Groups	Children Served by BEIS in FY 2007	Nevada Total 2003-2006
Normal Birth Weight ( $\geq 2,500\text{g}$ , $\leq 8,000\text{g}$ )	1,588 (71.63%)	133,335 (91.6%)
Low Birth Weight ( $\geq 1,500\text{g}$ , $< 2,500\text{g}$ )	355 (16.01%)	10,125 (6.96%)
Very Low Birth Weight ( $< 1,500\text{g}$ )	274 (12.36%)	1,954 (1.34%)
